\* by Andrew Lennoy. Chad was in the pump alley. Once he arrived, Andrew in an upset manner told Chad that he had fallen through the platform because of substandard bullshit work. Chad, accompanied by IPBS Supervisor Grainger, went to the boiler room to investigate. Chad went up the platform to check Andrew's claim of substandard work/welding only to confirm that additional fastener clips were needed. The additional fastener clips had already been ordered and had advised IPBS Supervisor of the matter.

The fastener's clips were acquired this past weekend and have already been installed.

Merlin,  
One last thing Andrew shouted out I fell to mention in the prior email. He stated he was going to sue Petro and IPOS because he fell through the platform.

Sorry gents.

Adrian, today was difficult for us considering the situation that occurred. We are reviewing the incident and once we have finalized our findings we will revert.  
Thanks for your report on the aftermath of the incident.  
Regards,  
Merlin

**Subject:** St Thomas

Good evening gents,

This is not to lessen the near mess that happened this morning and St Thomas; but I did want to make you guys aware of the interaction that happen afterwards.

Andrew confronted Chad about him falling through the grading of the platform on top of the boiler. Andrew calling our work "bullshit work" and our welding "substandard" and has no place at the facility. Chad went down to the boiler room and met Corey and Granger which were already investigating the incident. Chad says that they went up on the platform to check what welding Andrew was speaking of and realize that it was not the welding and only needed additional fastener clips. Chad then went back to the Control Room to talk to Andrew and this time Frank, our safety, get verbally attacked by Andrew too. Andrew calls Frank over by saying "hey you safety guy, I fell through a platform because of bullshit work that petro did. How could you guys consider yourself a welding company when all your work is substandard." At one point Andrew was yelling at Frank so loud that Frank had to tell him "I don't need this shit" and had to walk out of Andrew's office to avoid any more confrontation.

The reason I'm emailing you guys this is because I believe this was not professional. To be told that our company is "substandard" and that our work is "bullshit work" front of not only our employees but could be heard my IPOS employees too.

Last thing, for whatever it's worth, David Nagle did tell Chad and Frank that Andrew was jumping up and down on the platform to check its integrity.

Sorry for the nagging gentlemen, good night.
